### SUMMARY

**I design intelligent systems and the experience around them — from the agents that run a business to the films they make.**

Seven years as Deputy CEO leading digital transformation at board level across IT, legal and compliance in a heavily regulated environment — then, since May 2025, building the AI systems myself rather than delegating them. I can set the AI strategy and also tell you honestly which parts of it will fail, because I have operated them.

### EXPERIENCE

#### Founder & AI Product and Solutions Lead — Aideazz.xyz · Panama / Remote · 2025–Present

Founder-led AI lab. I design, build and operate its production AI systems end to end — the architect, the reviewer and the on-call.

#### AI Visibility Audit API — public product

[aideazz.xyz/api](https://aideazz.xyz/api)

Live scoring for how discoverable a site is to ChatGPT, Perplexity and Claude, not only Google. Same GEO/AEO engine that scores my own hub 100/100. Production floor from Oracle logs, rounded down: 420+ audits, 14,000+ signals, 210+ sites, median 85. Each check returns the fix and why it matters (34 why / 4 fix on a live stripe.com run).

#### Approved-send growth loop — HubSpot + Resend

The acquisition loop I run in production: research, qualify, draft, one human tap, send, then delivery and open written back to the CRM. 2,800+ deals, 1,300+ contacts, 2,100+ companies attributed by the agents. Send is fail-closed: if a PDF or signed .docx fails to load, the email is refused so it cannot claim an attachment it did not carry. I audit the CRM from the receiving end, not the sender's log: that found a trial-signup → HubSpot integration silently broken since launch — 28 real users never recorded; root-caused, fixed, backfilled all 28.

#### EspaLuz — paying WhatsApp / Telegram tutor

[wa.me/50766623757](https://wa.me/50766623757)

Bilingual relocation and language tutor on WhatsApp and Telegram. Persistent per-student memory (RAG + pgvector). PayPal subscriptions. Early users in 19 countries. I am the architect and the on-call.

#### Fail-closed publishing and a five-provider LLM chain

[aideazz.xyz/ai-ops-wiki.html](https://aideazz.xyz/ai-ops-wiki.html)

Every model call in the fleet has an ordered fallback (Anthropic, OpenAI, Gemini, Grok, Groq). When Groq deprecated the models I used, the fleet kept serving — a config change, not an outage. The daily publisher will not print a number it cannot trace; if the model decorated the facts, the day stayed silent. A 130-test eval harness (unit, integration, golden-set) runs in under a minute at \$0 API cost.

#### Operational Co-Founder — OmniBazaar, decentralised e-commerce · 2024–2025

### HOW I WORK

I operate an AI-native development environment where specialized agents handle much of the implementation execution. I own requirements, architecture, orchestration, evaluation, deployment, monitoring and production decisions. I judge a new data source by running it through the live gate before integrating it: the source added in August cleared 76% against ~21% for the rest of the fleet. I write the failure down and name it — clients can read how I debug before they hire me.

## AVAILABLE FOR

---

- Production LLM systems with fallback, evals and on-call ownership
- CRM and approved-send outreach (HubSpot, Resend, human-in-the-loop)
- AI-search visibility (GEO/AEO) audits and engines — ChatGPT, Perplexity, Claude
- Fail-closed publishing and internal AI operations for a founder-led team
