

ELENA REVICHEVA

Head of AI-Native Operations

Standards · operating cadence · adoption · agentic execution

Panama City, Panama · UTC-5 · Remote worldwide · aipa@aideazz.xyz · +507 616 66 716 · linkedin.com/in/elenarevicheva · github.com/ElenaRevicheva · aideazz.xyz/portfolio

SUMMARY

Operations leader combining seven years as Deputy CEO for Corporate Governance and Chief Legal Officer of a regional e-government operator with hands-on ownership of production agentic systems. I design the standards, controls and evaluation mechanisms that let AI absorb recurring operational work while a named human stays accountable for consequential decisions.

I operate an AI-native development environment where specialized agents handle much of the implementation execution. I own requirements, architecture, orchestration, evaluation, deployment, monitoring and production decisions.

Operating principle: encode the process, automate the evidence, keep a named human accountable for the outcome.

EXPERIENCE

Founder & AI Product and Solutions Lead — Aideazz AI Lab · Panama / Remote · 2025–Present

Founder-led AI lab. I design, deploy and operate its production AI systems end to end — architect, reviewer and on-call owner.

Standards and operating cadence

- Wrote and enforce a coordination protocol followed by three AI agents that cannot see each other's work: claim before touching shared systems, a handoff block on every pause (done / next / verified by / risk), and a start-of-session checklist built from failures that shipped. The document is the enforcement mechanism.
- An automated morning briefing replaces status check-ins: the day's priority queue, with a cited company brief on every opportunity in it.
- Production failures become named postmortems, controls and tests — published as a public [AI Operations Wiki](#) and [AI Operations SOP](#).

AI-native operating environment

- 15 long-running production services and 20 scheduled jobs on one cloud VM, all auto-restarting; a 5-provider LLM fallback chain so a provider failure degrades service instead of stopping it; 600+ automated tests (unit, integration, golden-set) running in under a minute.

Approved-send growth loop — HubSpot + Resend

- Research → qualify → draft → one human approval → send → delivery and opens written back to the CRM. Agents have attributed 2,800+ deals, 1,300+ contacts and 2,100+ companies; outreach sends stay behind a human decision.
- Fail-closed by design: if a required PDF or signed document cannot load, the email is refused rather than claiming an attachment it did not carry.
- I audit from the receiving system, not the sender's log. That exposed a trial-signup → CRM integration silently broken since launch; root-caused, fixed and backfilled all 28 missing users.

Evaluation and feedback loops

- A job-discovery agent learns hourly from decisions recorded in the CRM; each decision is stored with its source posting and replayed as an offline evaluation set before a judge change ships.
- Hard constraints such as location and pay are deterministic rules, not model judgment. A proposed RAG upgrade scored lower on real evaluation data, so it stayed off.
- New data sources are tested against the live qualification gate before integration: the August source cleared 72%, against ~6% for the rest of the fleet.

AI Visibility Audit API — public production product (aideazz.xyz/api): measures how discoverable a website is to ChatGPT, Perplexity and Claude; 420+ audits, 14,000+ signals, 210+ sites (production floor from logs); every check returns the fix and why it matters.

Deputy CEO for Corporate Governance & Chief Legal Officer — JSC “E-GOV OPERATOR” · Penza region · 2011–2018

A ~60-person company moving the delivery of public services into electronic form for the regional government.

- Ran corporate governance: organized the board meetings, with stakeholders primarily from the Penza regional government, and carried board decisions through to implementation.
- Led the legal side of the service programme: made sure every public service the company built in electronic form was lawful under existing legislation, and managed those projects from the legal side.
- Conducted due diligence on public contracts and represented the company in court litigation.

Operational Co-Founder — OmniBazaar, decentralized e-commerce · 2024–2025

Deputy CEO, Business Development — Fundery LLC, fintech · 2017–2018

Business development in an emerging fintech and blockchain environment, including tokenization and its regulatory questions.

HOW I OPERATE

Standards as executable systems. Recurring rules are encoded into workflows, deterministic gates, evaluations and reports — not left to memory.

Evidence over automation theatre. A workflow reporting “success” is not proof the business outcome happened; I verify in the receiving system.

Human accountability by design. AI handles repeatable execution; consequential actions keep explicit approval and a named owner.

Failure becomes infrastructure. Silent failures, bad assumptions and regressions become named postmortems, controls and evaluation cases.

SELECTED PRODUCTION EVIDENCE

15 long-running services · 20 scheduled jobs · 11,000+ opportunities through agentic qualification · 2,800+ CRM deals attributed by agents · 1,300+ contacts · 2,100+ companies · 420+ AI-visibility audits · 14,000+ signals · 600+ automated tests · 5-provider LLM fallback chain. Production floors from logs and live CRM data, counted 28–29 September 2026.

TECHNICAL FLUENCY

AI & orchestration: LangGraph · RAG (pgvector) · multi-provider LLM routing · evaluation systems · human-in-the-loop workflows · **Engineering:** Python · TypeScript · Node.js · FastAPI · PostgreSQL · Docker · Playwright · **Operations:** HubSpot · Resend · Make · Oracle Cloud (OCI) · Git/GitHub · APIs · **AI-native development:** Claude Code · Cursor · specialized coding and operational agents

EDUCATION & PROFESSIONAL DEVELOPMENT

MA, Social Psychology — Penza State University · 2018 · Presidential Program for Executive Management — RANEPa · 2015 · Blockchain Regulation — MGIMO, Moscow · 2017 · Polkadot Blockchain Academy, PBA-X Wave 3 · 2025 · How-To-DAO Cohort · 2025 · Anthropic Academy — Claude Certification Program · 2026, in progress · Internship — Nyskapingsparken Innovation Park, Bergen, Norway

LANGUAGES

English — fluent (professional) · Spanish — intermediate (working; resident in Panama) · Russian — native · French — elementary
