PROFILE

Native Russian speaker, born and educated in Russia, who has written, published and worked professionally in Russian for over a decade, and who works in English every day. I listen for what makes speech sound native — stress, intonation, rhythm and register — the same things I shape in verse. And I write every judgement down in plain English, with the reason, so another reviewer can check it.

LANGUAGE WORK — published, professional, and measured

- **Published author in Russian. 46 poems** written in Russian and published on the LITPROM literary portal through its editorial board, 2019–2025. Stress, rhythm and register are the material I work in.
- **Published author in English as well. 53 poems** written in English, published in my own ATUONA gallery, Dec 2024 – Sep 2026 — so I hear the difference between a native line and a translated one from both sides.
- **Seven years of professional work in Russian, where one word changes the meaning.** Seven years as Deputy CEO and Chief Legal Officer of a Russian public-sector e-government operator: drafting and negotiating contracts and regulatory positions, presenting to boards and regulators.
- **Spoken audio, mixed and measured.** My automated film pipeline locks each narration line to its clip, ducks music under the voice and normalises the mix to broadcast loudness (–16 LUFS; the latest film measured –15.7). **8 films** published, each render verified before release.
- **Written justifications that another reviewer can check.** I built a scoring rubric and an AI judge, then replayed **51** rejected items: **20** were wrong, caught before release. I also keep a public record of **22** written incident analyses — what happened, why, and the named pattern — the same discipline an evaluation rationale needs.
- **Language technology, built and used by real learners.** EspaLuz, a bilingual Spanish–English AI tutor on WhatsApp and Telegram, with voice in and voice out and per-family memory. Selected by micro1 for the Titan Proton human-data project.

LANGUAGE & AUDIO TOOLKIT

Russian: native — stress, intonation, rhythm, register (legal, literary, conversational) · **English:** fluent, daily professional and literary use · **Audio:** FFmpeg, voice/music mixing, loudness normalisation (LUFS), frame-accurate timing · **Evaluation:** rubric design, written rationales, review of AI-generated text and speech output.

EXECUTIVE BACKGROUND
