

● OPEN TO REMOTE ROLES

PANAMA · UTC-5

AI-NATIVE SINCE MAY 2025

Elena Revicheva

AI-native systems operator · product builder · executive leader

I design the system, direct AI-assisted implementation, ship it, operate it — and own the outcome.

15

production services I run, all auto-restart

2,800+

CRM deals created & attributed by my agents

8

published AI films from my own creative universe

7 yrs

Deputy CEO & Chief Legal Officer

• 01 · THE OPERATING MODEL

Not a candidate plus tools. *One AI-native operating unit.*

ELENA · OWNS THE DECISIONS

Judgment & ownership

What should exist, how it must behave, and whether it actually worked.

- Requirements
- Architecture
- Orchestration
- Evaluation
- Deployment
- Monitoring
- Production decisions

+

AIPA · EXECUTES AT SCALE

Agents & infrastructure

Implementation code, research, drafting, media generation and scheduled operations.

- Claude Code
- Cursor
- Specialised agents
- 5-provider LLM fallback
- 15 services · 20 scheduled jobs

=

THE UNIT · SHIPS AND STAYS ACCOUNTABLE

Shipped, monitored systems

From an ambiguous problem to a deployed, measurable result — with one named owner who answers for it in production.

“

I operate an AI-native development environment where specialized agents handle much of the implementation execution. I own requirements, architecture, orchestration, evaluation, deployment, monitoring and production decisions.

HOW I WORK

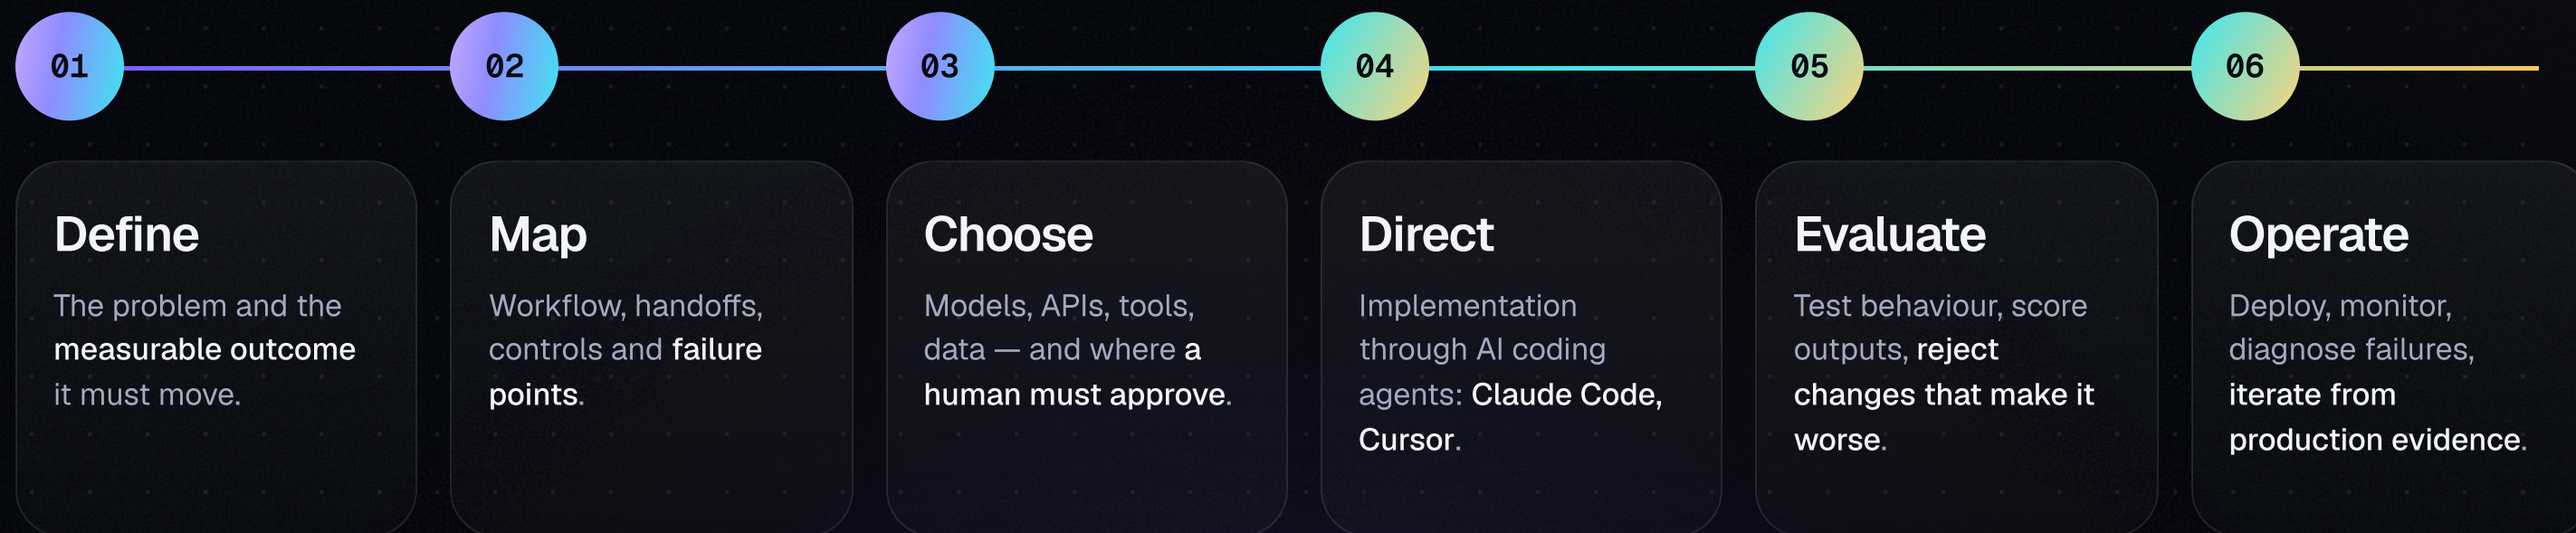

THE DISTINCTION

I don't sell unaided typing speed.

I own the decisions that determine what gets built, what ships, how it behaves — and what happens when it fails.

• 02 · WHAT I ACTUALLY DO

I turn ambiguous business and creative problems into *working AI-native systems*.

← PRODUCTION EVIDENCE FEEDS THE NEXT DECISION

Production ownership

• 03 · WHERE I CREATE THE MOST VALUE

Three lanes. *One pattern underneath.*

AI Operations

- Workflow discovery & automation
- Agent orchestration
- CRM & pipeline operations
- Monitoring & feedback loops

PROOF IN PRODUCTION

2,800+

deals, 1,300+ contacts and 2,100+ companies attributed by agents in HubSpot — research, qualify, draft, one human tap, send.

AI Product & Transformation

- Prototype the experience
- Connect systems & deploy
- Organise operations around it
- Improve from evidence

PROOF IN PRODUCTION

420+

audits across 210+ sites by my AI Visibility Audit API — a live public product scoring how ChatGPT, Perplexity and Claude see a business.

Creative AI Systems

- Concept, narrative & world-building
- Image · video · audio model orchestration
- Production pipelines
- Published experiences

PROOF IN PRODUCTION

8 films

published from my ATUONA universe — 99 poems in Russian and English, made end to end by my own pipeline.

THE THROUGH-LINE *I design intelligent systems and the experience around them — from the agents that run a business to the films they make.*

• 04 · EVIDENCE

I operate systems, *not slides*.

LIVE ON ONE CLOUD VM · \$0/MONTH

15

long-running production services + 20 scheduled jobs

All auto-restart. I am the architect and the on-call.

- Research
- CRM
- Outreach
- Content
- Evaluation
- Film

11,000+

job opportunities processed

LangGraph pipeline with human decision gates; learns hourly from my CRM decisions.

DISCOVERY & QUALIFICATION

2,800+

CRM deals run by agents

1,300+ contacts · 2,100+ companies attributed in HubSpot. Sending is fail-closed.

AI OPERATIONS · REVOPS

420+

AI-visibility audits

14,000+ signals across 210+ sites. My own hub scores 100/100.

GEO · AEO · TECH SEO

8

published AI films

Crimson Escape: 3:36, 16 generated shots, mixed to -15.7 LUFS broadcast loudness.

CREATIVE AI PRODUCTION

600+

tests, under a minute

Unit, integration and golden-set evals; a 5-provider LLM fallback chain.

RELIABILITY & EVALUATION

7 yrs

Deputy CEO & Chief Legal Officer

Government digital-services operator: transformation, IT, governance.

EXECUTIVE FOUNDATION

All figures are floors from production logs and the live CRM API, counted 28-29 September 2026.

● 05 · OWNERSHIP UNDER FAILURE

What I do when it breaks — *and what it's called.*

SILENT FAILURE

An integration that never said it was broken

FOUND Trial sign-ups had never reached the CRM since launch — while the sender's log looked healthy.

DID Audited from the receiving end, root-caused, fixed, and backfilled all 28 lost users.

VACUOUS GUARD

A spending cap that could never fire

FOUND The pre-render budget guard read a price field the vendor never sends — so every price passed.

DID Fixed the guard against the vendor's real response and published the postmortem.

EVALUATION GATE

The more complex model lost

FOUND A RAG upgrade to my screening judge scored lower on an evaluation set built from my own real decisions.

DID Shipped it switched off. Accuracy beats sophistication.

GRACEFUL DEGRADATION

A provider retired its models. Nothing went down.

FOUND A vendor deprecated the models my agents used.

DID The five-provider fallback chain kept the fleet serving — a config change, not an outage.

→ Postmortems with named failure modes, published openly at aideazz.xyz/ai-ops-wiki.html

The roles I'm *built for*.

• AI OPERATIONS & IMPLEMENTATION

AI Operations Lead

AI Implementation Lead

AI Automation Lead

AI Workflow Architect

AI Systems Operator

Agentic Workflow Designer

• AI PRODUCT & TRANSFORMATION

AI Product & Automation Lead

AI Transformation Lead

AI Innovation Lead

AI Adoption Lead

Generative AI Product Lead

AI Prototyping Lead

• CREATIVE TECHNOLOGY

Creative Technologist — GenAI

Generative AI Producer

Creative AI Pipeline Builder

GenAI Production Lead

AI Innovation Producer

NOT MY FIT

Roles whose core value is unaided coding, algorithm drills or live coding — or proving the work can be done without AI.

• FULLY REMOTE

PANAMA · UTC-5 · OVERLAPS US EASTERN & CENTRAL

LATAM-FRIENDLY TEAMS

ENGLISH · RUSSIAN

AI-native systems *ownership.*

Former executive. Hands-on builder. Production operator. Creative technologist.

I'm looking for a team that wants someone to own the path from an ambiguous problem to a deployed, measurable AI system.
