PROFILE

A published poet and the founder of a generative film studio, with seven years before that as **Deputy CEO and Chief Legal Officer** presenting to boards and regulators. I work where content, design and accuracy meet: I rebuild a message so it reads clearly, and I can explain in writing why each element changed — or why it was **right to leave it alone**.

PRESENTATION DESIGN & VISUAL STORYTELLING

- **Executive and board presentations in PowerPoint for seven years** as Deputy CEO & Chief Legal Officer of a national e-government operator (2011–2018): strategy, budgets, transformation programmes and regulatory positions, for audiences that read every number.
- **16-slide bilingual investor deck** (English/Spanish), live at aideazz.xyz/pitch.html — narrative arc from problem to proof, and a metrics slide that states the numbers "as they are". Extended this week with a new slide without altering a single existing one: keep what works, change only what earns it.
- **Message hierarchy for mixed audiences:** the same facts rewritten for business owners, HR and technical reviewers — plain-language outcomes first, technical detail labelled and moved down.

ARTS & MEDIA PRACTICE — 2019 to present

- **ATUONA**, generative film studio and gallery: **six finished short films**, each with its own score, narration, generated poster and title cards; every release checked frame by frame.
- **98 published literary works** — atmosphere, sequence and tone are my native craft.
- **Product film** for my own software product: concept, script, generation, edit, soundtrack and typography in the product's brand fonts. **Nineteen versions** — most of the gain came from rejecting weak shots honestly, not from adding more.
- **Podcast** "Building in Public On The Go" — 11 episodes; **blog** — 150+ bilingual posts.

EDITORIAL JUDGMENT, ACCURACY & RATIONALE

- **Legal-grade precision on terminology and caveats:** seven years drafting and negotiating agreements where one misplaced qualifier changes the meaning.
- **Accuracy by design:** my publishing pipeline refuses to publish any number it cannot trace to a verified source, and blocks near-duplicate pieces — accuracy enforced, not hoped for.
- **Written rationale as a habit:** a public engineering wiki of **21 incidents and 18 named failure patterns**, each recording what broke, why, and the named pattern behind it.

AI TRAINING DATA & EVALUATION

- **Rubric design and evaluation:** built an AI screening judge on one shared rulebook with **413 automatic tests**; replaying 51 rejected items proved **20 were wrongly rejected** — caught before release.
- **Scoring framework shipped as a product:** a public audit that grades any website on 34 checks in four weighted categories, with a prioritised list of fixes aideazz.xyz/api.
- Daily practitioner of Claude, GPT and Gemini, with image and video models (Flux, Runway, Kling, Veo) — I know where their output is convincing and where it quietly fails.

EDUCATION, LANGUAGES & TOOLS

Education: MA Social Psychology, Penza State University · Presidential Program for Executive Management, RANEPa Moscow · Anthropic Academy, Claude Certification (in progress)

Languages: Russian (native) · English (fluent) · Spanish (intermediate) · French (basic)

Tools: Microsoft PowerPoint · HTML/CSS slide decks · Claude · GPT · Gemini · Flux · Runway · Kling · Veo · FFmpeg · HubSpot · Make.com

Availability: Contract, remote, sprint-based cycles; Panama UTC-5 overlaps US and European hours.
