PROFILE

Seven years as a **Deputy CEO**, so I know what an executive actually needs handled before being asked — and two years building the AI systems that handle it. I automate the operations rather than merely coordinating them.

SELECTED WORK — shipped, live, and measured

- **I run the fleet, not just the code. 15 long-running services and 20 scheduled jobs** on a single cloud VM at \$0/month infrastructure, 24/7. I am the architect, the reviewer and the on-call — three-layer recovery so failures heal without me.
- **Forward-deployed by default.** I run my own discovery, onboarding and follow-up through a CRM I built the automation for, so I hear the problem behind the request and know which version of it someone will pay for.
- **Took a product from a personal problem to paying subscribers.** A bilingual AI tutor built from my own family's need as an expat in Panama, through to billing — persistent per-user memory, voice, OCR, subscriptions. Early revenue, honestly small; included because I owned it from problem to paid.
- **I publish my own postmortems. 21 incident write-ups** in a public AI Ops wiki — you can read how I reason about failure before you interview me.
- **Automation that runs a business when nobody is watching.** Finding customers, qualifying them, drafting the reply, updating the CRM and reporting what happened — designed, deployed, and still on call for it.
- **Board-level operating experience.** Seven years as Deputy CEO running digital transformation across IT, legal and compliance in a heavily regulated environment — comfortable being the person who names the trade-off in front of people who did not want to hear it.

TECHNICAL FOUNDATION

Data: SQL, PostgreSQL, Oracle Autonomous Database, pgvector, ingestion pipelines, RAG retrieval · **AI:** Claude, OpenAI, Gemini, Grok, Groq; multi-provider routing; agent orchestration; prompt systems; eval harnesses · **Build:** Python, TypeScript, FastAPI, Node.js, REST/webhooks · **Ops:** OCI, PM2, systemd, cron, monitoring and alerting · **Analytics:** GA4, UTM attribution, Search Console, HubSpot · **Method:** AI-assisted development (Claude Code, Cursor) as the daily workflow.

EXECUTIVE BACKGROUND
