PROFILE

I make companies findable and quotable in AI answers, and I measure it rather than assert it: structured data, AI-crawler access, answer-ready content, and a recurring citation probe across Google AI Overviews, Gemini, OpenAI search and Perplexity. I built the scoring API that grades it, so the method is inspectable.

SELECTED WORK — shipped, live, and measured

- **Shipped a public scoring API 0 to 1. 34 automated checks in 4 weighted categories**, returning a grade and a prioritised fix list. I designed the weighting — the judgement call of what counts and how much — and the output a non-technical buyer can act on.
- **Evals as a ship gate, not a vanity metric. 529 passing tests** across unit, integration and golden-set layers, running in about a minute at \$0 API cost. It is how I answer "is the model good enough to ship" with evidence rather than a feeling.
- **I run the fleet, not just the code. 15 long-running services and 20 scheduled jobs** on a single cloud VM at \$0/month infrastructure, 24/7. I am the architect, the reviewer and the on-call — three-layer recovery so failures heal without me.
- **Built the discovery engine that makes a business quotable by AI assistants**. Structured data, AI-crawler access, answer-ready content and daily automated publishing — measured with a weekly citation probe across Google AI Overviews, Gemini, OpenAI search and Perplexity, plus first-touch-to-CRM attribution.
- **Took a product from a personal problem to paying subscribers**. A bilingual AI tutor built from my own family's need as an expat in Panama, through to billing — persistent per-user memory, voice, OCR, subscriptions. Early revenue, honestly small; included because I owned it from problem to paid.
- **I publish my own postmortems. 21 incident write-ups** in a public AI Ops wiki — you can read how I reason about failure before you interview me.
- **Automation that runs a business when nobody is watching**. Finding customers, qualifying them, drafting the reply, updating the CRM and reporting what happened — designed, deployed, and still on call for it.

TECHNICAL FOUNDATION

Data: SQL, PostgreSQL, Oracle Autonomous Database, pgvector, ingestion pipelines, RAG retrieval · **AI:** Claude, OpenAI, Gemini, Grok, Groq; multi-provider routing; agent orchestration; prompt systems; eval harnesses · **Build:** Python, TypeScript, FastAPI, Node.js, REST/webhooks · **Ops:** OCI, PM2, systemd, cron, monitoring and alerting · **Analytics:** GA4, UTM attribution, Search Console, HubSpot · **Method:** AI-assisted development (Claude Code, Cursor) as the daily workflow.

EXECUTIVE BACKGROUND

Deputy CEO & Chief Legal Officer — JSC "E-GOV OPERATOR" | 2011–2018

Led public-sector digital transformation at board level for seven years; ran cross-functional IT, legal and compliance teams in a heavily regulated environment.

Deputy CEO, Business Development — Fundery LLC (fintech) | 2017–2018

EDUCATION & LANGUAGES

Presidential Program for Executive Management, RANEPa Moscow (2015) · MA Social Psychology, Penza State University (2018) · Polkadot Blockchain Academy, PBA-X Wave 3 (2025)

Languages: Russian (native) · English (fluent) · **Spanish (working — resident in Panama)** · French (elementary)
